

Customized Diagnostic Testing Reports

Below you will find several diagnostic testing reports that physical medicine practitioners need to use on a daily basis. Many of the diagnostic instruments today do not have appropriate reports that look professional and are easily produced in the office. I have used these reports for several years and I have been urged to allow others the opportunity to use them in daily practice. The sample report images are adobe files. You can download a working copy of each spreadsheet.

You will find that you can easily enter all of your testing data in the working trial reports and the spreadsheet it will produce wonderful reports for your patients. These reports are a complete Win - Win to everyone involved. Obviously the doctor has great objective data to help analyze the patient condition and progress for evaluation and management of the patient. The patient can get a copy of the printed report for better education and understanding of their condition and progress. These reports can be provided to insurance companies to document the status of the patient and to provide great documentation for the reimbursement of the testing itself. Billing codes used for these tests can range from the specific Evaluation and Management codes to other codes that match the description of the procedure.

The spreadsheets are protected so that I can protect the hundreds of hours of development time that I have spent on these spreadsheets. If you would like to order a spreadsheet for your use, You can fill out the information that you would like to appear on your customized report and I will e-mail your file. I do not offer a money back guarantee because you will have the opportunity to see if you like the reports with the working trials. - **Dr. Robert B. Sheely**

Thermeter Diagnostic Testing Report - Cervical \$50.00 _____
Thermeter Diagnostic Testing Report - Thoracic\$50.00 _____
